

WHO WE ARE

“Providing value for your startup experience, at the right stage of your journey”

AGORA is a startup launcher building a new style of virtual ecosystem for young startups and start-up enthusiasts. With an average age of 22, we are a Generation Z team of startup enthusiasts who understand that startup education and growth doesn't come easily to everyone. To overcome that, we are building **AGORA** to help all demographics launch into the start-up world, in the way that is right for them.

We aim to provide the right value for companies at the right stage of their journey, through our range of products:

Start-up platform: virtual company builder helping companies to access the products and services, funding, advisory and education they need to get off the ground. Supported by integrated APIs to support a virtual work environment

Freelancer platform: provision of specialised advisory services

Start-up bootcamps: teaching everyone about how to launch a start-up from A-Z

Why work with us:

- Lead by Ex-Heads/Founders of two of UK's largest student organisations
- Team of 10+ nationalities operating out of 5 countries
- Founded by grads from LSE, HEC Paris & Warwick
- Advisory network comprising of leading Tech & Corporate figures
- Fast paced & virtual work environment
- Experience from organisation taking part in investment round funding

Role Description

Context: Virtual role in helping to contribute to one of the UK's leading virtual start-up launchers and to help create a new model of startup incubation. You'll be working in the developer team and reporting to the **AGORA** CTO. Working closely with the Product team, you will help to contribute to the core architecture of the Virtual Incubator and/or freelancing platform and lead a key role in the delivery of one of the newest methods of ways of launching a start-up.

THE ROLE

WHAT WE'RE LOOKING FOR

What we are looking for (skills):

- Proven experience in working in a startup/high growth environment
- Open-minded attitude to working in a virtual and fast paced environment
- The moment you wake-up, you're up and working attitude #100%candoattitude
- Passionate about changing the space in which startups launch
- Fluent English, additional languages (French/Spanish/German) are a plus
- Relevant Work Experience in software development companies is a plus

Technical Experience Required:

Backend Dev / API - || Full-Stack

- Java, C#, Javascript (NodeJS), PHP or similar
- REST
- Databases (MySQL, MongoDB, the more the better)
- DevOps experience is a plus
- Test Driven Development is a plus

Frontend Dev

- Javascript (Angular2 or React, or comparable modern web frameworks)
- HTML5/CSS3
- SPA

Additional Requirements:

- Good understanding of Git
- Open to learning new technologies
- Good teamplayer
- Understanding of basic agile project management (Scrum, etc.)

What you get from this:

- Ad-hoc & flexible working environment. Opportunity to work on high-growth soon to-be funded venture with some of EU's leading student entrepreneurs.
- Equity in organisation (based on motivation and progress to development of role)
- A say in how our business strategy is driven forwards
- Join a network comprising some of the world's leading tech personalities, corporate professionals and change makers in the EU tech space
