

## **MOSAIQ LABS**

**Chief Technology Officer - CTO**

**Salary: Yes | Equity: Yes**

### **About MosaiQ Labs**

We are building an interactive information digestion platform that will help users write research papers (not only academic research) better and faster. Our initial product is targeted at university students. Through a combination of machine learning and visualization, students will be able to cover and manage increased volumes of information, structure and improve the quality of their coursework, and significantly gain time. This is the first step of a broader vision to build smart applications that will seamlessly integrate into people's workflows, letting them focus on the interesting, creative, and intellectual aspects of their work.

### **Job Brief**

MosaiQ Labs is looking for a technical co-founder to join the team.

Your first mission will be to work together with MosaiQ Lab's CEO to crack the technical challenges implied in our product development and build an MVP. As we grow, you will be entirely responsible for all technical aspects of MosaiQ Labs. We are looking for self-starters with a computer science background and experience in natural language processing. You must be familiar with research, keep up to date with latest technical developments and feel capable of leveraging collective knowledge through creativity.

If you feel like jumping on an amazingly stimulating adventure, join us and let's define the future of work together!

### **Requirements**

- Computer science BSc/MSc
- Experience in machine learning for natural language processing
- Experience in topic modeling as a plus
- Ability to leverage research to develop real world applications
- Preferred professional experience: 2+ years
- Ability to take the technical lead & evolve in an uncertain environment
